## **CDPH Reports Ebola Test Results on Sacramento Patient Negative (New/Final)**

**CDPH Press Release dated 8/21/2014**

Low-risk patient tested out of an abundance of caution:

The California Department of Public Health (CDPH) announced [yesterday, 08/21/14] that the federal Centers for Disease Control and Prevention (CDC) has tested the sample from the patient under investigation who is hospitalized in Sacramento and reports the test results are negative for Ebola. CDPH has been working in cooperation with the Sacramento County health department and the Kaiser Permanente South Sacramento Medical Center to ensure appropriate CDC protocols were followed in the investigation, testing, diagnosis and treatment of the patient.

There are currently no confirmed cases of Ebola in California. There have been no patients admitted to California hospitals who are considered to be at high risk of Ebola according to CDC criteria.

“We are pleased with the negative outcome of the Ebola test and wish the patient a speedy recovery,” said Dr. Ron Chapman, CDPH Director and state health officer. “The case in Sacramento County demonstrates that the system is working. This patient was quickly identified, appropriate infection control procedures were implemented, and public health authorities were notified.”

If a person has travelled to an affected country and develops a fever within three weeks of their return, they should contact their health care provider and let the provider know of their travel history.

The risk of the spread of Ebola in California is low. Any patient suspected of having Ebola can be safely managed in a California hospital following recommended isolation and infection control procedures. Suspect cases of Ebola will be investigated by local health departments in consultation with CDPH.

State and local public health officials in California are monitoring the situation closely and taking steps to keep Californians safe. Our advanced health care system has appropriate protocols in place to prevent the spread of this often deadly disease.

Ebola is an infectious disease caused by the Ebola virus. Symptoms may appear anywhere from two to 21 days after exposure and include fever, headache, joint and muscle aches, weakness, diarrhea, vomiting, stomach pain and abnormal bleeding. It is classified as a viral hemorrhagic fever (VHF) because of the fever and abnormal bleeding. Among the VHFs, Ebola is feared because of its high mortality. There are no specific treatments but supportive therapy can be provided to address bleeding and other complications.

For more information about Ebola, please visit [CDPH's website](#)

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

High pressure offshore will maintain dry weather conditions through the weekend. Areas along the coast will continue to see night and morning low clouds and fog.

#### **San Francisco Weather:**

Night and morning low clouds and slightly below normal afternoon high temperatures are forecast through the weekend. Warmer temperatures are possible inland by the middle of next week.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY**

#### **Sacramento Weather:**

Weak trough over the West Coast with northwest flow aloft will bring dry conditions with a near to a few degrees below normal temperatures through early next week. High pressure moving inland over the West Coast will bring warming to near or a little above normal Tuesday into Thursday.

#### **Hanford Weather:**

There will be little change in the weather pattern through the weekend with daytime high temperatures near to slightly below normal. By the beginning of next week, high pressure will begin to build over Central California resulting in a minor warming trend.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

Cooler conditions can be expected along with more extensive stratus and fog across the coasts and valleys. For early next week, high pressure will develop. This will bring warmer conditions and less coastal stratus through the week. A couple of eastern pacific tropical systems will generate some high surf conditions across local beaches through next week.

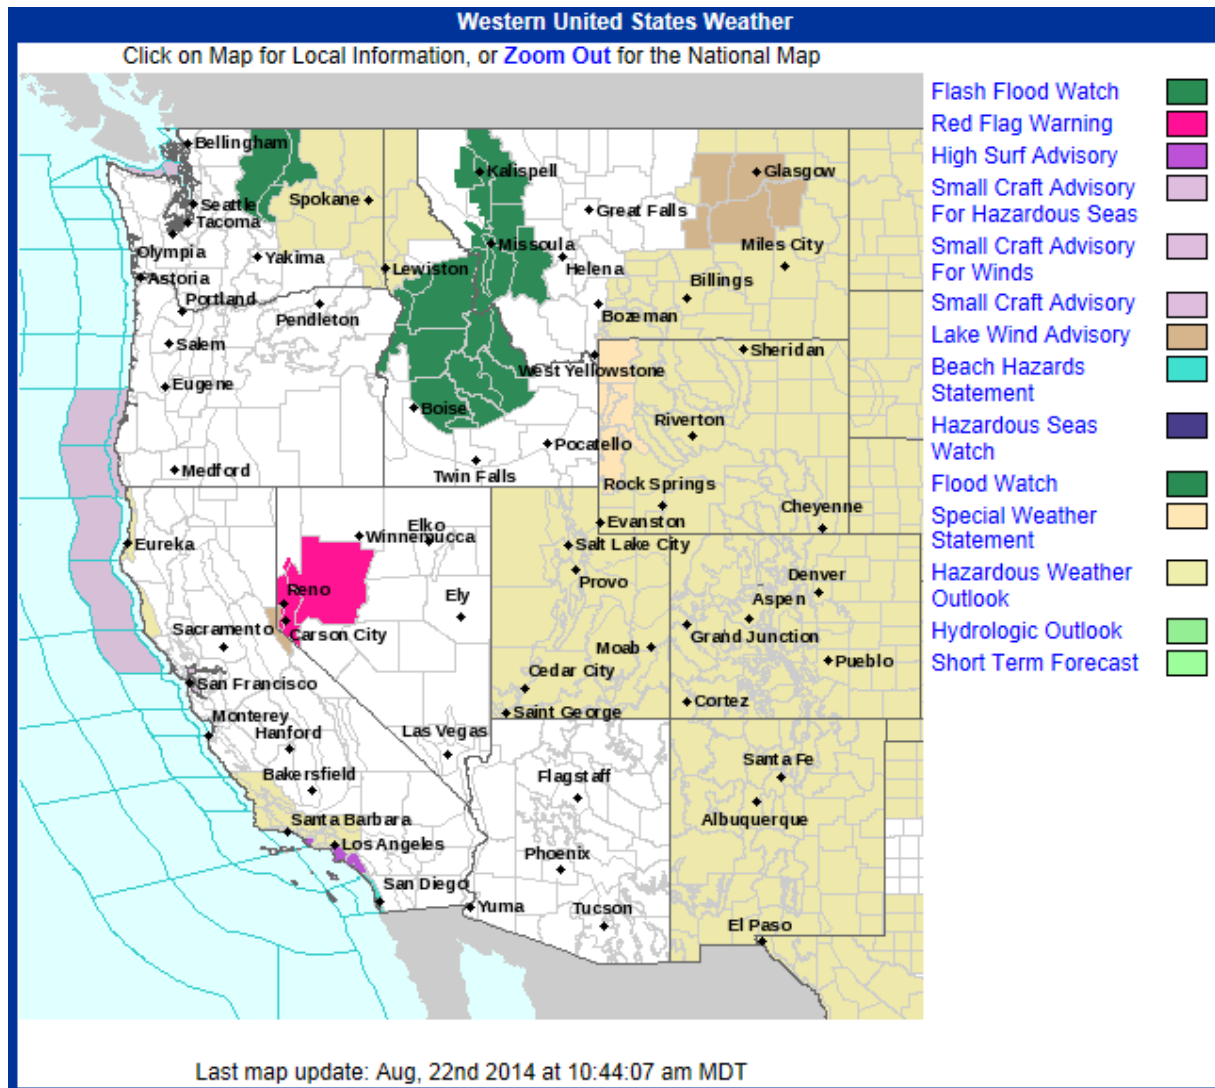

#### **Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

A trough of low pressure moving inland through the west will bring stronger onshore flow through the weekend with slight cooling and gusty west winds in the mountains and deserts during the late afternoon through late evening. Temperatures will warm to near average early next week and slightly above average for the latter half of next week as high pressure develops over California.

#### **Southeast California Weather:**

Drier conditions are expected through the weekend along with slightly cooler than normal temperatures. A return to a more typical monsoon pattern is expected next week with afternoon and evening showers and thunderstorms returning.

## **Cal EOC Incident – 2014 Drought**

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

### Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 20<sup>th</sup> : Don Pedro 42%; Exchequer 17%; Folsom Lake 40%; Lake Oroville 32%; Millerton Lake 47%; New Melones 24%; Pine Flat 12%; San Luis 20%; Lake Shasta 32%; Trinity Lake 31%; Pyramid Lake 94%; and Castaic Lake 44%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)  
Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water<sup>1</sup> to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

### Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.  
[http://www.waterboards.ca.gov/waterrights/water\\_issues/programs/drought/emergency\\_regulations\\_waterconservation.shtml](http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/emergency_regulations_waterconservation.shtml)
- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
